

HR at Your Fingertips

Human Resources is at the heart of the organization. HR Managers need to be able to quickly access and update information while staying on top of recruiting, onboarding, and offboarding needs. Southwestern Payroll powered by Cloud's HR module is designed to help managers manage employees and growth.

Key Features

Dashboard

Access an interactive overview of key HR indicators. Quick-click charts of key indicators and HR statistics that you can customize. Drill-down access to supporting detail data.

Employee Master File

Maintain your important employee information in one central and secure repository. Changes made here can apply across the system into payroll and time and labor. Add additional information like training history and property assignments.

Employee History

Track information and change dates for positions, pay, employment status and employment type.

Employee Review & Events

Stay on top of review with reminders and notes. Upload documentation to support the session. Track employee review history including the date, rating, and reviewer. Create events outside of reviews to track and complete.

HR Templates & Advisor

Easily access important HR templates and topics. Stay on top of new federal and state legislation that might result in changes to your HR and payroll needs.

Beyond HR

Dedicated Support

Southwestern Payroll powered by Cloud's technology comes with system and service support – ready when you need it.

Cloud-Based

Southwestern Payroll powered by Cloud's payroll and HR technology is 100% cloud-based allowing you to access information when you need it from anywhere in the world with internet access.

HR tools that meet your needs.

Meet Southwestern Payroll powered by Cloud.
